

Winter Vaccinations 2024/25 and Spring Summer Vaccinations 2025

Introduction

The Winter Vaccinations Team at NHS Greater Manchester (GM) are part of the Population Health directorate and support system-wide delivery of seasonal vaccinations for COVID-19 and Influenza.

We work with Primary Care Networks, Community Pharmacies and Hospital Trusts to plan and coordinate activity within the National programme. We monitor vaccine supply into the system and gain delivery assurance from delivery sites.

We also fund extended services schemes aiming to widen access to seasonal vaccinations, including mobile services, outreach to places of worship, homelessness services and promotional materials.

Winter Vaccinations 2024

COVID-19 & Flu AW24 programme review

Care Home COVID-19 Vaccination Data Comparison to AW23

Greater Manchester

Locality	AW24 Eligible population	AW24 Vaccination events	AW24 % uptake
Bolton	1282	947	74%
Bury	1026	743	72%
HMR	1344	858	64%
Manchester	1724	996	58%
Oldham	1211	870	72%
Salford	1129	838	74%
Stockport	1642	1313	80%
Tameside	943	688	73%
Trafford	957	719	75%
Wigan	1760	1173	67%
GM	13,018	9,145	70%

- Care home uptake appears to have dropped.
- There are known data issues which are being worked through with national teams.
- There are over a 1,000 care home beds missing vaccination data for GM on FDP.
- We are trying to gather feedback on general attitude to vaccine from care home residents, to inform the evaluation and planning for spring 2025 and AW25

ICB	AW23 Eligible population	AW23 Vaccination events	AW23 % uptake
NHS Greater Manchester ICB	15,660	12,465	80%

Care Home Flu Vaccination Data Comparison to AW23

Greater Manchester

Locality	AW24 Flu Eligible Tableau	AW24 Flu Vaccination Tableau	AW24 Flu Uptake Tableau	AW2023 Uptake Tableau
Bolton	1,290	1,007	78%	80%
Bury	1,166	922	79%	81%
HMR	1,325	951	72%	77%
Manchester	1,845	1,137	62%	71%
Oldham	1,199	885	74%	77%
Salford	1,318	921	70%	74%
Stockport	1,834	1,525	83%	83%
Tameside	941	708	75%	69%
Trafford	1,210	977	81%	83%
Wigan	1,684	1,197	71%	74%
GM	13,812	10,230	74%	78%

- There are some known data issues.
- Illustrates the same theme of drop in uptake seen across all cohorts.
- In previous years, this would be the highest uptake cohort.
- Appears to still have higher uptake rates than COVID-19 vaccinations.

Over 65 Covid Vaccination Data Comparison to AW23

Greater Manchester

Locality	AW24 % Uptake	AW23 % Uptake
Bolton	52.45%	62.78%
Bury	56.88%	67.41%
HMR	50.69%	62.67%
Manchester	35.40%	48.28%
Oldham	53.05%	64.29%
Salford	47.71%	56.92%
Stockport	65.34%	74.33%
Tameside	55.83%	65.30%
Trafford	58.39%	67.95%
Wigan	39.37%	60.69%
Grand Total	50.56%	62.60%

Data source is different from previous slides. Taken from GM tableau where people can opt out from data sharing so is usually approximately 8% lower than other sources.

Illustrates the trend of decreased uptake in this age cohort

Over 65 Flu cohort comparison to AW23

	65 and over						
	Registered	Vaccinated	% uptake	Registered	Vaccinated	% uptake	
	2023/24			2024/25			change
NORTH WEST	1,406,750	1,083,127	77	1,440,767	1,057,595	73.4	-3.6
GM	493,869	375,147	76	501,267	361,020	72	-4.0
NHS BOLTON	54,182	41,101	75.9	54,867	37,209	67.8	-8.1
NHS BURY	38,187	29,513	77.3	38,704	28,387	73.3	-4.0
NHS OLDHAM	41,399	31,731	76.6	41,850	30,416	72.7	-3.9
NHS HMR	40,168	30,433	75.8	40,836	29,808	73	-2.8
NHS SALFORD	39,633	28,917	73	40,255	27,922	69.4	-3.6
NHS STOCKPORT	63,526	52,737	83	64,430	51,601	80.1	-2.9
NHS TAMESIDE	39,339	28,736	73	39,890	27,833	69.8	-3.2
NHS TRAFFORD	43,755	34,633	79.2	44,409	34,000	76.6	-2.6
NHS WIGAN	66,882	52,347	78.3	67,755	50,523	74.6	-3.7
NHS MANCHESTER	66,798	44,999	67.4	68,271	43,321	63.5	-3.9
England	11,087,097	8,600,024	77.6	11,374	8,491,702	74.7	-2.9

- Biggest drop in uptake across the cohorts. Usually, they are the most compliant cohort.
- Is this due to introduction of RSV or delayed start to the programme?
- Do we need more comms around why Flu vaccine should be given later?

Spring Summer 2025 Programme Planning

Eligibility for Covid vaccination Spring Summer 2025

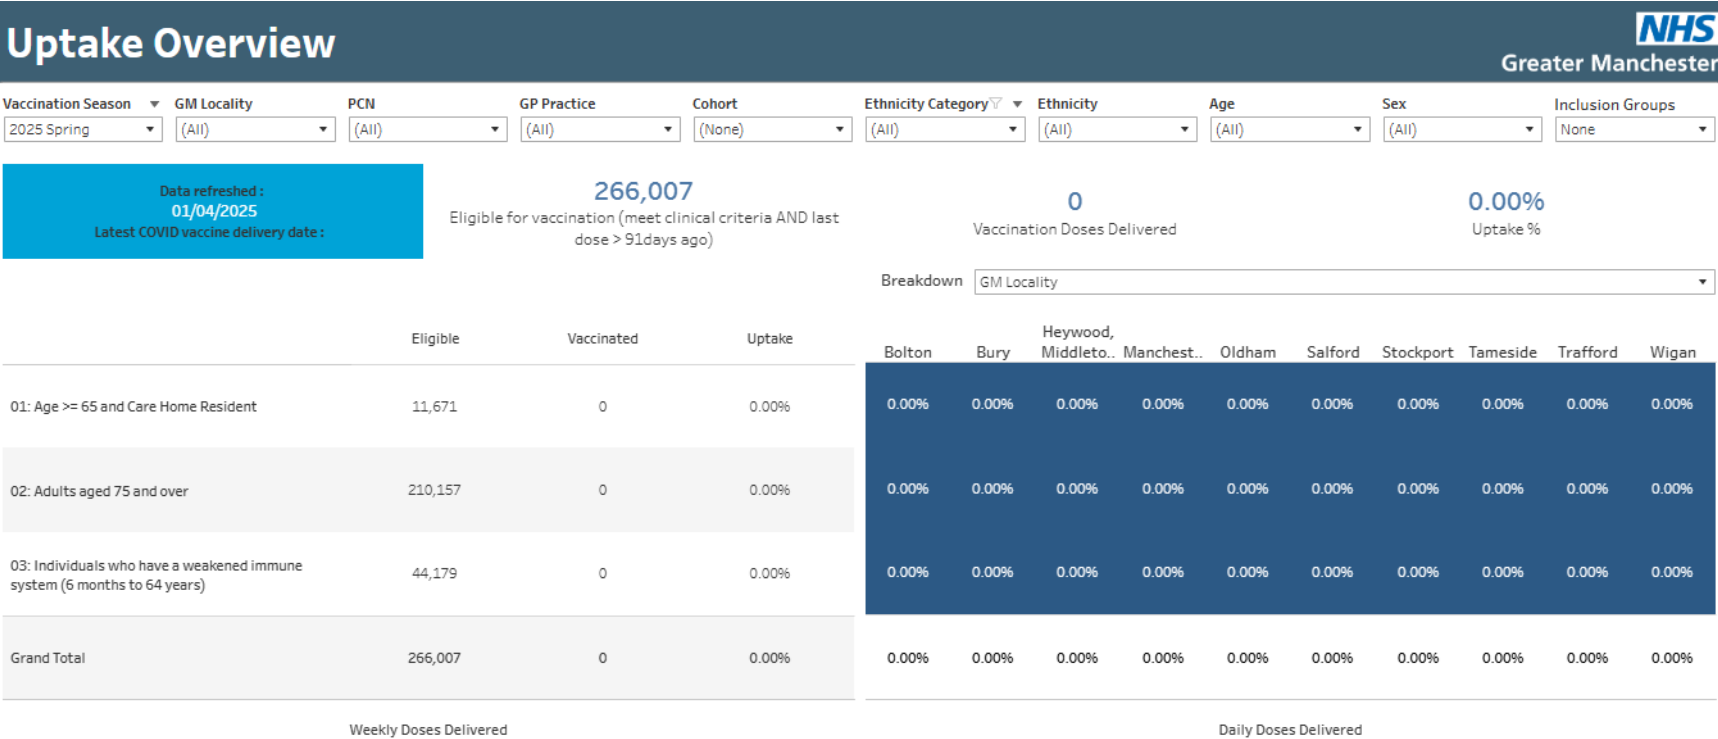

Greater Manchester

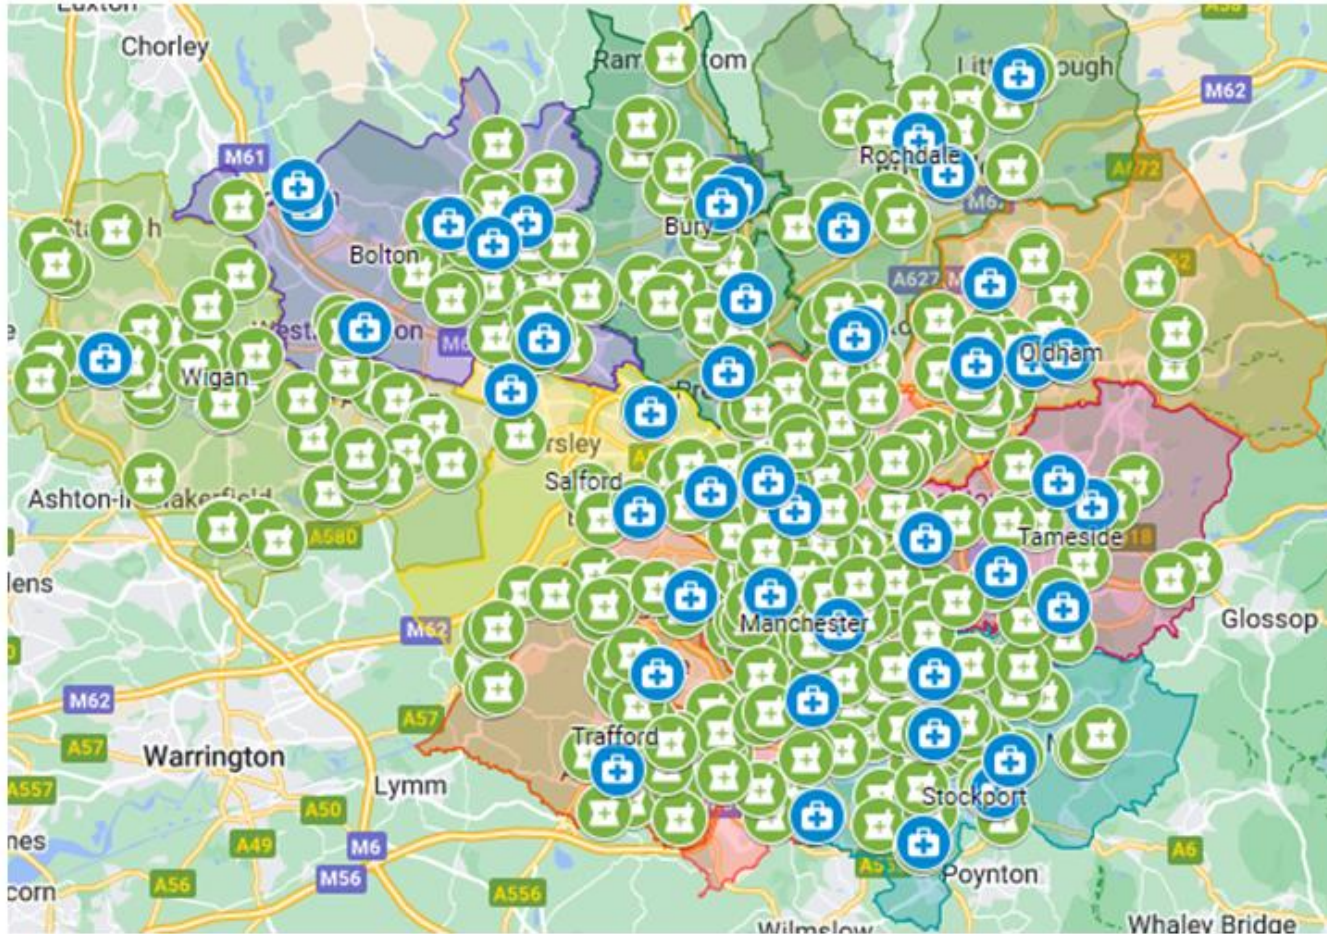

- JCVI advises the following groups should be offered the COVID-19 vaccination from 1st April 2025;
- Adults aged 75 and over
- Residents in a care home for older adults
- Individuals aged 6 months and over who are immunosuppressed (as defined in the “immunosuppression” sections of tables 3 and 4)
<https://www.gov.uk/government/publications/covid-19-the-green-book-chapter-14a>

The last day of the Spring programme will be 17th June 2025.

Cohort Sizing (Tableau 17.02.25)

Designated Delivery Sites – Map View

- **399 total delivery sites**
 - 354 CPs
 - 45 PCNs
 - HHs not vaccinating during the Spring/Summer programme
 - PCNs are identified in blue, CPs in Green – total volume of CPs is much greater than PCNs although PCNs will likely achieve around 50% of the total activity
 - Sufficient coverage across the GM footprint
 - Risk of waste due to the high volume of sites

Communication Approach - Spring

- Objective is to inform and encourage COVID-19 vaccinations among over 75-year-olds and care home residents using no-cost or budget-friendly communication strategies.
- Increased education to staff in care home.
- Communication Preferences:
 - Clear, simple language
 - Face-to-face promotion
 - Written materials from national
 - Paper copies of leaflets are available to order for free or download in 29 languages. With a Braille version and easy-read resources available.
- Communication Channels - Organic Promotion Strategies:
 - Texts, Posters, VCSE advocacy, Digital media promotion (social media and websites), news outlets.
 - Promotion of the pop-up clinics and outreach offers via digital platforms.

Locating Sites/Booking Vaccinations

Booking vaccinations can be done via:

- NBS (National Booking System) opens to the public 25th March – 16th June
- LBS (Local Booking system from GP/PCN)
- Walk In Vaccination Finder site [Find a walk-in COVID-19 vaccination site - NHS \(www.nhs.uk\)](https://www.nhs.uk/vaccine-finder/)

Other Adult Immunisations

Pneumococcal, Shingles and RSV Vaccinations

- Uptake in all adult immunisations has dropped.
- RSV vaccine new programme introduced September 2024 for those:
- aged 75 years of age on or after 1 September 2024 (that is, with a date of birth (DOB) on or after 1 September 1949). These individuals should be vaccinated on or after **(but not before)** their 75th birthday
- adults who are aged between 75 and 79 years of age on or before 1 September 2024 (DOB between 1 September 1945 and 31 August 1949). Such individuals remain eligible up to the age of 79 years and 364 days (in other words, up to and including the day before the individual's 80th birthday)
- adults who turn 80 years of age between 2 September 2024 and 31 August 2025 (DOB between 2 September 1944 and 31 August 1945) remain eligible up to and including **31 August 2025**
- **RSV, Shingles and Pneumococcal vaccines are year-round programmes and people should attend straight away when invited.**

Thank you - Any Questions?
